

Christmas Candle

To make the decorated candle, you will need

- Tissue paper
- White or cream Church Candle
 - Snowflake stamps
 - Red ink
- Greaseproof/Parchment paper
 - Scissors
 - Heat Gun

1. Stamp the images onto the rough side of the Tissue paper enough times to cover your candle.

2. Cut out the images, you do not need to be too precise as the Tissue paper around the stamped image will not be seen when the candle is finished

3. Cover one side of your candle with the cut out stamped images and wrap the greaseproof paper tightly around the candle.

Apply heat until the image appears translucent through the greaseproof paper. Remove the paper and repeat to cover the rest of the candle.

Add a ribbon to the base of the candle as a final decoration.
