

2010 Calendar

What you will need:

Square Papers, Printable Calendar download, Laminator, Number Stickers, Patterned papers, Large brad, Binding wire.

Tools:

Sizzix Big Shot, Sizzix Bigz Daisy Die, Xyron Creative Station/DS Laminating cartridge, Bind It All Machine.

How to:

1. Print the calendar months, cut them to size. Attach in order on both sides of the patterned square papers. Adhere close to the bottom to allow space for binding at the top.

2. Use a Laminator to strengthen your pages so they will be able to stand on your desktop.
3. Using a Bind it All machine, bind the top of your pages together.
4. Decorate the front of your calendar with a focal point as I have here with the daisy die and add the year 2010.

Inside Pages:

Your calendar will be able to stand up with its strong laminated pages
