

Christmas Door Hanger

Materials:

- door hanger template;
- 1 piece of cardboard 30cmX15cm (*tip: I always keep the boxes that comes from some scrapbooking material order, so I can use pieces of the cardboard in my projects*)
- 1 piece of crimped velvet paper 26cmX11cm (or any other paper or fabric);
- double sided tape;
- 08 pieces of green fabric with white dots – 10cmX1,5cm each one;
- 06 pieces of red fabric with white dots – 10cmX1,5cm each one;
- Christmas embellishments (I used 03 Christmas chipboard stickers);
- 06 cherries (these one are used to decorate X-mas tree);
- crop-a-dile;
- glue for fabric;
- black ink pad or black pigment ink;
- pencil;
- scissors;
- craft knife.
-

Step-by-step (how to make it):

1- With a pen or a pencil draw the template of the door hanger on the cardboard (see template at the end of the project);

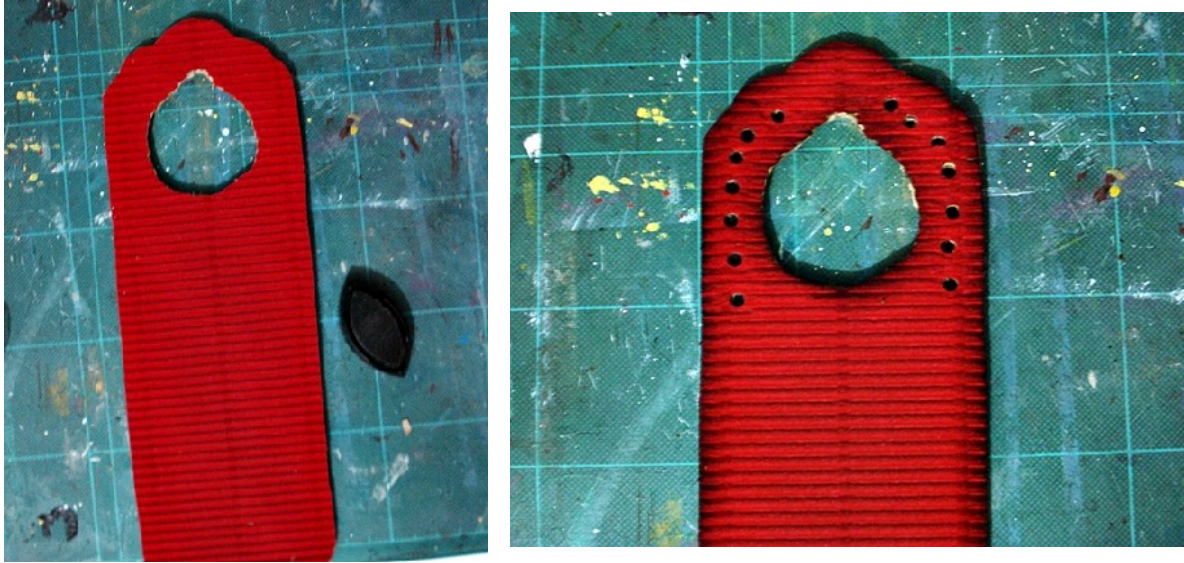

2- Cut the door hanger from the cardboard using a scissors or a craft knife;

3- Glue your paper with double sided tape in the cardboard and cut out the overage paper, as the door hanger shape;

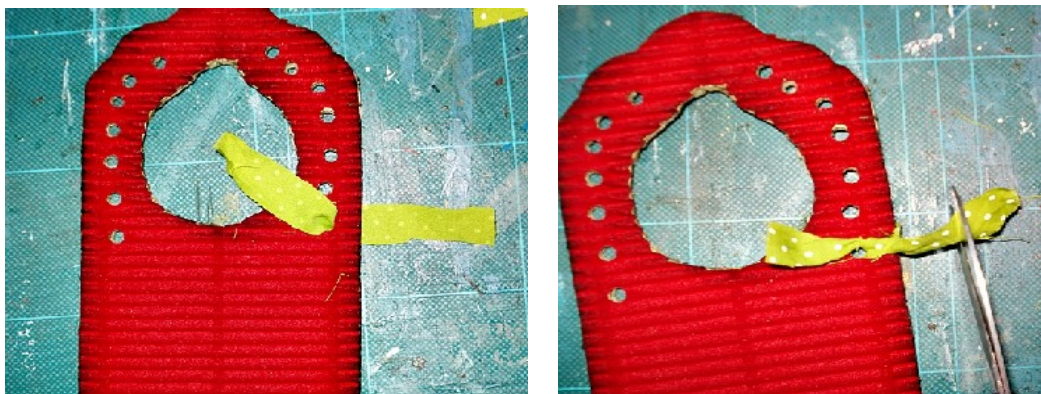

4- Rub the black ink pad all over the border of the door hanger;

5- Use your crop-a-dile to make, in both sides of the circle, 07 holes at right and at left, like this:

6- Tie the pieces of fabric ending with a knot in all holes you made with the crop;

7- Tie some cherries with the tied fabrics, like this:

8- Add your embellishments with fabric glue, or foam tape.

And your Christmas Door Hanger is ready!!!

Some Ideas:

- You also can make the door hanger using chipboard and covering with felt, fabric or even painting with acrylic paint. Or make some textures with gesso to look like some snow.
- Have fun and make your own embellishments to decorate your door hanger by printing some Christmas images, stamping, using felt, fabric or patchwork elements.

Now it's your turn!

Make your Christmas Door Hanger, personalize it! Use your creativity and have fun!

Hope you enjoy this tutorial!

Kisses,
