

Craft Room Sign

Materials:

piece of mounting board
alphabet rub-on transfers
various buttons
paper flowers
pink pen
various ribbons and fibers
silicone glue
scissors
leather punch

Spell out "craft room" onto the center of the mounting board. Using the pink pen draw a dashed line about 0.5cm in from the edge of the mounting board. Punch two holes in the top of the board and tie your ribbons and fibers to allow the board to hang. Lay the flowers and buttons out to make sure you create the look you want. Stick them all in place using silicone glue.

You could...

...alter the board to spell out a child's name to hang on their door.

...change the buttons and flowers for any other embellishments you can find in your stash.

...create a sentiment board to give someone special as a gift.
