

## Recycle recycle recycle

That's what we are told to do so much nowadays so here's a recycling project for you.

Using the scraps from the scrumptious kit only available at [Indigo Mill](#) I turned some jam jars into a money saving idea!

### Ingredients

Scrumptious kit – patterned paper, alpha's and beads

Ribbon (own stash)

Acrylic paint

File and pva glue

- First off I painted the lids my chosen colour with acrylic paint
- I cut strips of patterned paper big enough to go around the jars and adhered with pva glue
- Using the string supplied I made some tags and then using the alphas I popped on some numbers 20 for 20p and 50 for 50p!
- I placed ribbon around the edge of the jar lids so I don't scratch the paint each time I open them.

And that's it! Chose your required amount of money to save and make a funky jar to keep it all in...

As always don't forget to link us to your creations too.

Happy recycling
